Professional Summary

CCNA-Certified Network Engineer with expertise in routing, switching, and network operations gained through Cisco based training and real-world enterprise experience. Experienced in network documentation, troubleshooting, and infrastructure support within fiber and enterprise network environments. Knowledge of enterprise networking protocols, network monitoring tools, and Cisco device configuration. Seeking a Network Engineer role focused on network reliability, operations support, and infrastructure deployment.

Licenses and Certifications

Cisco Certified Network Associate (CCNA) – Cisco Systems | February 2026

- Cisco ID. No.: CSC015040742
- Valid Through: February 16, 2029

Licensed Electronics Engineer – Professional Regulation Commission | March 2026

- Valid Through: September 08, 2029

Licensed Electronics Technician – Professional Regulation Commission | March 2026

- Valid Through: September 08, 2029

Trainings

CCNA 200-301 Training Bootcamp – RivanCyber Training Institute Inc. | January 2026

- Completed CCNA 200-301 training covering subnetting, VLANs, inter-VLAN routing, OSPF, NAT, ACLs, and enterprise network troubleshooting.
- Configured and troubleshot real Cisco routers and switches in simulated enterprise environments. Applied device documentation practices, and introductory network automation concepts under instructor supervision.

Technical Skills

- **Networking:** LAN/WAN, TCP/IP, VLAN, VPN, DHCP, DNS, NAT, ACLs
- **Protocols:** OSPF, EIGRP, BGP, STP, RIP
- **Cisco Technologies:** Cisco IOS, Cisco Packet Tracer, Cisco Catalyst Switches, Cisco Routers
- **Tools:** Wireshark, GNS3, SecureCRT, Putty
- **Operating Systems:** Windows Server, Linux (Ubuntu, CentOS), Switch Engine(Extreme)
- **Scripting:** Python, C++, HTML, CSS
- **Electronics & Hardware:** Circuit Design, Circuit Analysis, PCB Design, Fusion Splicing
- **Office Suites:** Microsoft Office, Google Workspace
- **Soft Skills:** Problem-solving, Teamwork, Communication, Time-management

Education

Bicol University Polangui | 2021 – 2025

- Bachelor of Science in Electronics Engineering (BSECE)

Capstone Project

Prediction of Hatching Time of Chicken Eggs Using Machine Learning | 2025

- Developed an AI-powered candling system using YOLOv11 trained on custom annotated datasets, achieving 74.89% prediction accuracy.
- Designed and constructed a functional device utilizing a Raspberry Pi 4 Model B for real-time imaging, on-device inference, and LCD-based prediction display.

Work History

Network Specialist - Power Mac Center Inc. | March 2026 - Present

- Monitored and supported network operations for offices and 100+ stores nationwide.
- Configured and deployed network infrastructure for 10+ stores and managed them personally.
- Managed multiple fortinet firewalls through fortigate and SDWAN
